Sir:

RESPONSE

In response to the official action mailed March 11, 2003, the applicants hereby elect Group I. In response to the election of species requirement, in response to part (a), prostate cancer is elected, and in response to part (b), eulexin is elected as the GnRH agonist. The percentage weights elected are:

6-1 (Cl. 17-22)

5% (w/w) eulexin (on an active basis)

1% lecithin (w/w)

balance stearin

These elections are made with traverse. With regard to the election of Group I, it is noted that a restriction requirement was not made in the parent application, now granted as U.S. Patent 6,337,318, and that the scope of all of the claims of the present application were fully searched by the Examiner of the parent application. Notably, the claims of the parent application were of broader scope than those of the present

application, claim 1 of the present application being a combination of original claims 1 and 6. It is also to be noted that the primary "inventive step" resides in the identification of an excipient composition which essentially, comprises stearin and lecithin and which is suitable for the sustained release of a wide variety of GnRH agonists.

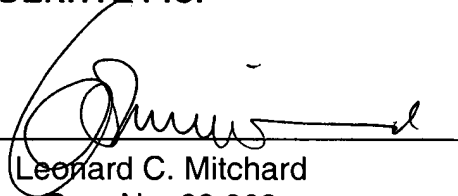

In light of the above, it is believed that the composition which embodies this invention and is defined in claim 1 constitutes a single general inventive concept unifying the claims of Groups I to IV. Reconsideration of the restriction requirement with respect to Groups I-IV is accordingly respectfully requested.

The requirements for election of species as recited in paragraphs (a) and (b) on page 3 of the action are likewise traversed. Such election of species requirements were not made in the parent case (now U.S. Patent 6,337,318), and the scope of all of the claims of the present application were fully searched by the Examiner in that case. It is not understood why the approach for the present case has changed. Reconsideration and withdrawal of the election of species requirements are accordingly respectfully requested.

Respectfully submitted,

NIXON & VANDERHYE P.C.
